

ST AUBYN'S SCHOOL FIRST AID POLICY **(Including EYFS)**

Policy Statement

First Aid is the emergency care of the injured or ill.

St Aubyn's School, including EYFS, will ensure, so far as is reasonably practicable, that first aid arrangements will be managed in compliance with the Health and Safety (First Aid) at Work Regulations 1981.

First Aid provision should cover all staff, pupils and visitors. Management of first aid arrangements should include adequate training & re-training of First Aiders, provision of first aid equipment and facilities and recording of first aid treatment.

First Aid Arrangements

A Medical Room is available from 08.30 until 5pm each weekday during term time. The School employs a Registered Nurse. The School Office can contact the School Nurse in an emergency when the Medical Room is unattended. Staff have access to the Medical Room in the absence of the School Nurse.

First Aiders

A number of staff hold a First Aid at Work, Paediatric First Aid or Basic First Aid Certificates. The list of first aiders will be found in the staffroom, the reception office, the secretary's office and the Medical Room.

Notices are displayed, which details names and contact information of First Aiders.

Members of staff are encouraged to attend a Basic First Aid Course every three years. P.E. staff are strongly encouraged to hold a First Aid Certificate.

For EYFS, training in paediatric first aid continues to be a requirement, with at least one person with a current certificate on the premises at all times when children are present and accompanying children on outings. It must be clear on the certificate that the course followed has covered first aid for children.

First Aid Boxes

These are sited in many parts of the school and are checked and replenished by the School Nurse at the beginning of term.

Staff using First Aid items should inform the School Nurse if the contents need re-stocking during the term.

The boxes are clearly marked and should be easily accessible.

Contents comply with the standards set out in by the H.S.E. (List available in each box).

Some extra items may be added, depending on the department. Medicines are not 'First Aid materials' and are not to be kept in the boxes.

A Defibrillator, transit chair, stretcher and blankets are located in the Sports Hall.

School Outings

A Travel First Aid Bag will be taken on a school trip along with any emergency medication that may be required.

Parents are responsible for advising staff if their child will require any medication on a school trip. No medication is to be carried by a pupil unless discussed with the teacher in charge.

The teacher in charge of a school trip is responsible for informing the School Nurse of the trip and requesting a First Aid Bag. First Aid bags are to be returned as soon as possible to the Medical Room on completion of the trip.

Any injury/illness sustained by a pupil should be reported to the School Nurse on return from the trip. If the trip is out of School hours or returns after the School Nurse has left, a Yellow Pupil Accident Report Form should be completed. This can be collected from the School Office or Staff Room or accessed on the School Network under 'Non pupil share/staff documents/medical'. There are also some in the First Aid Bags.

Reporting

Every attendance to the Medical Room is recorded on ISAMS with name, date, time, and description of incident, treatment and outcome.

All treatment, with the exception of Nursery, given by First Aiders should be reported to the School Nurse for recording on ISAMS and in case of required follow up.

Minor bumps and grazes sustained by EYFS children can be treated by Paediatric First Aiders. A record of these injuries will be kept by EYFS Staff. For children in the EYFS it is the school's duty to inform parents of any accident or injury sustained by the child on the same day, or as soon as reasonably practicable, and any first aid treatment given.

If the School Nurse is not available a Yellow Pupil Accident Report Form must be completed and given to the School Nurse on her return

The Accident Book is completed for staff injuries and incidents. The location and advice on how to complete the Accident Book can be obtained from the School Nurse. (Appendix 1)

Certain illnesses and injuries (to staff, pupils and visitors) are reportable to the Health and Safety Executive (HSE) under the RIDDOR regulations. The School Nurse will give advice and report to the HSE as necessary

Schools must report to parents the school's procedure for responding to children who are ill or infectious.

Severity of Injury

Most injuries and illness will be dealt with by the School Nurse in the Medical Room.

A note will be sent home with the pupil if they have sustained a head, eye or nose injury in case of a delayed reaction. First Aiders should also send one of these pro-forma letters home in the absence of the School Nurse. (Available in the Medical Room or School Office).

Notes (or e-mail/telephone call where appropriate) should also be sent home if medication has been administered.

The parents are contacted by telephone if the injury/illness requires further medical treatment, or if the pupil would benefit from resting at home.

Parents are contacted if a pupil needs to go to Casualty and are asked to transport them.

An ambulance is always called for a pupil in a serious condition and the parents contacted.
